Subject: Blood lead levels in East Chicago children

Dear Ms. Burns:

My contact info is below. I'm looking for any detail about recent blood lead levels in children, and especially sources if you have that info. You mentioned that the incidence of lead contaminated blood above the screening threshold is low, and that in follow-up you've found that the kids have recently moved from other locations or that you were able to conclude that it generally came from cookware. Any information you can provide about those two items would be very helpful for us.

Thanks for your help!
Rik
